

The « Plague and *Yersinia pestis*» team is seeking a highly motivated post-doctoral fellow interesting in the understanding of the transmission of plague by fleas. The position is advertised for at least 1 year (starting October 1st 2019).

The host laboratory is located on the campus of the Institut Pasteur de Lille (France) and is one of the 13 teams of the Lille Center for Infection and Immunity. It comprises 11 people including 4 permanent researchers, 1 engineer, 2 technicians, 1 Post-doc, 2 PhD students and 1 Master 2 student.

The candidate should have a PhD degree with a very strong expertise in molecular biology and bacterial infectious diseases. Having worked with arthropods, imaging, and/or histology will be a bonus.

The applicants should send their CV, a motivation letter and 2 references in a single PDF file to Florent Sebbane, florent.sebbane@inserm.fr.

The call is open from now until filled.
